

Technology Modernization in Global Supply Chains

Global Logistics Systems Report

BHYY Capital Research

March 2026

This research publication is part of the BHYY Capital analytical program examining technological innovation, scientific advancement, and industrial transformation.

Overview

Supply chains are increasingly recognized as strategic infrastructure rather than purely operational systems.

Technology Drivers

Automation, predictive analytics, routing intelligence, and integrated data platforms are transforming global logistics capabilities.

BHYY Perspective

BHYY Capital views logistics modernization as a durable transformation theme supported by technology-driven operational intelligence and improved network resilience.
